BOOKS, ARTICLES AND SELECTED WEBSITES

Fetal Alcohol Spectrum Disorders: Education Strategies

<https://www.oregon.gov/ode/educator-resources/2016fallconference/fasd.pdf>

Center for Disabilities, Sanford School of Medicine of the University of South Dakota
The educational strategies presented in this 240 page handbook are intended to be helpful to all teachers who work with students who may have a Fetal Alcohol Spectrum Disorder. While many of the strategies are general and appropriate to use with all students who may share some of the learning needs of students with FASD, they should be especially helpful to use with students who have been diagnosed with an FASD.

Transforming the Difficult Child: The Nurtured Heart Approach, Glasser, Howard

The Nurtured Heart Approach is an amazing set of strategies developed specifically for children with ADHD and other challenging behaviors to facilitate parenting and classroom success.

The Out-of-Sync Child: Recognizing and Coping with Sensory Integration Dysfunction,
Kranowitz, Carol Stock (1998)

The first accessible, clearly written guide to Sensory Integration Dysfunction, and a drug-free approach that offers new hope for parents.

SUPPORT GROUPS

FASt Friends: A Family and Community Support Network

Operated by NOFAS Washington this group provides education, information, support, and advocacy to caregivers, families, providers of service, and community members as well as to the affected individuals by using support group meetings for parents and other adults as well as a social/support group for affected teens. In addition, they operate a confidential Facebook group and a parent sponsorship model as well as parent retreats and family activities.
